

ABOUT US

ADIDAC COMIMPEX is a factory founded in 1994, specialised in production of a wide range of wooden handles (for brooms, brushes, garden tools and construction tools) as well as sorghum brooms. Adidac has started as a family business, today offering a stable place to work for 50 employees.

In present we are among the largest producers of wooden handles in Europe, with competitive pricing and extremely good quality. Our factory is manufacturing the handles from full logs, this way we assure that our customers have best quality sorted from the earliest stages of production, as well as one of the best prices on the market.

SOURCING AND MARKET

Over time we have learned that the relationship with customers consists in capacity to supply the desired products in the shortest possible time and at a quality to be proud of then when the product comes out our factory gates. These things combined lead to growth of the relationship with the business partner and at increase sales on both sides.

In order to make sure that our activity is having the least impact on environment we are using wood from sustainable sources only as well as managing all the waste in the most responsible way. We are 100% FSC® FSC-C116025 certified as well as ISO 9001 for quality management.

Look for our FSC® -certified products

Our main market is Germany, Romania, UK and Switzerland, working with some clients for more than 15 years. We consider a long term business relationship is extremely important as it provides continuous sustainability for both sides.

TRANSPORTATION AND PACKING

We are flexible and able to provide the method of transportation that can best fit each business partner:

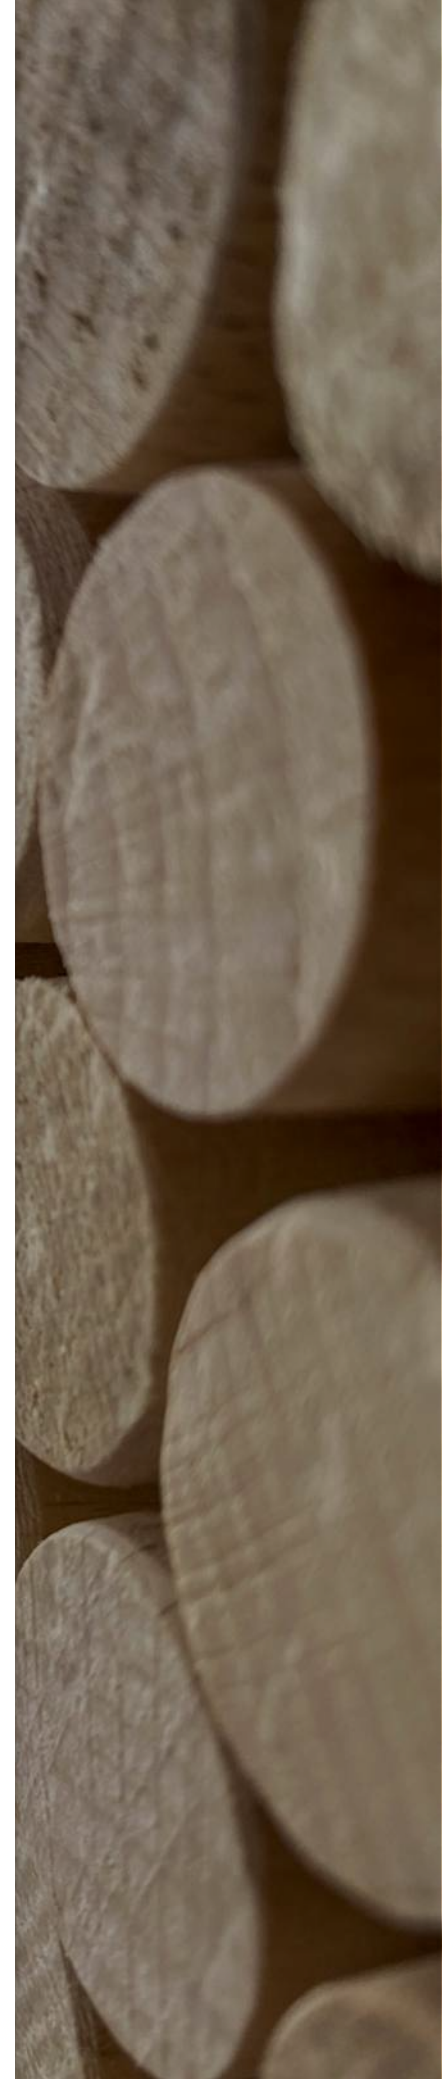

EXW – The goods can be prepared and put on pallets, ready for being picked-up by the client. On a pallet usually we load 1800 pcs with a height of about 180cm, however this can be adjusted on client`s requirements. The base of the pallet is 80cm x 120cm (or 130cm/ 140cm ... 180cm depending on the length of the handles chosen by the customer.

In carton boxes – We can provide packing in carton boxes, favourable due to the fact that it can be taken out in the store directly, without the needing of taking the handles off the pallet and putting them out in the store. Dimensions of the box: 80cm x 120cm x 120cm (or 130cm/ 140cm ... 180cm).

DDP to warehouse – With full truck or half truck delivery to central warehouse of the client, goods can be put both on pallet and in box.

DDP to each store requested by the client – We are able to deliver as low as one pallet to any location in Romania for our customers, covering all the logistic necessity, available for both pallet and the box. Personalisation: The pallets are made from bundles, the number of handles in one bundle can vary from the client`s needs. As well as printing with customer logo can be done directly on wood.

OUR MODELS

We are working mostly with hard essence for obtaining the best quality possible for both durability and feeling while holding in hand, however if required by the client, we can discuss also other essence. The wood is dried at an optimum humidity in order not to curve, get molded, nor be too rough for the skin touch.

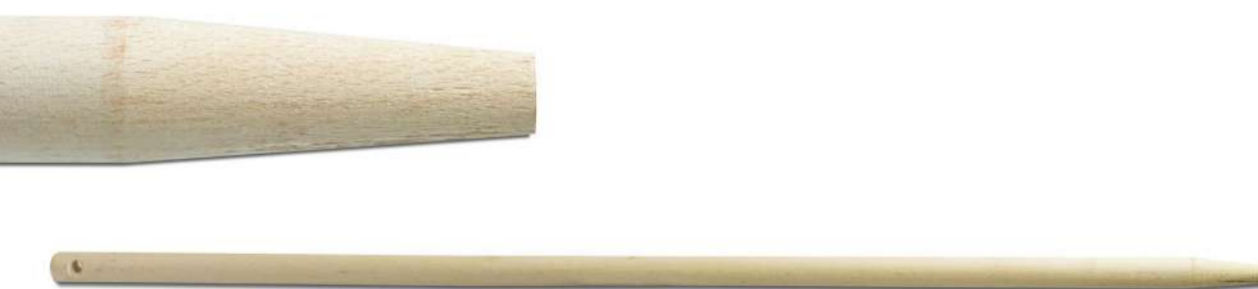

For brushes, brooms and mops:

- Diameter of 24mm, with or without hole, with or without label
- Length 120cm / 130cm / 140cm / 150 cm
- Head option: Natural Italian screw / Metal German screw / Conical / Flat

For gardening:

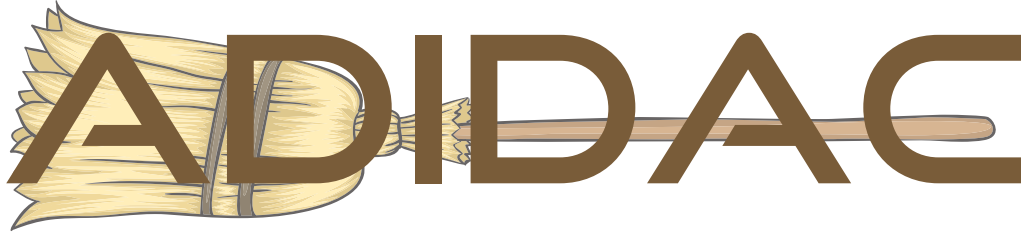

- Diameter of 28 mm, with or without hole, with or without label
- Length of 160cm / 170cm / 180cm
- Head option: Conical

For constructions:

- Standard sizes for shovel, curved shovel, garden, rake, spade, axe and sledge hammer

Thank you and we hope to reach a long-term collaboration as soon as possible.
